# Interlogix Postes

We develop and operate **Vertical Logistics Parks** in strategically located areas within Mexico City and the country's main cities.

Interlogix Posts enjoys a strategic location, situated just one block away from Sur 122 and Camino Real to Toluca, and only 1.65 km from the access to the Periférico at the back of the alvaro Obregón Alcaldia. Furthermore, it is located less than 80 meters from the last-mile warehouse of "MercadoLibre SMX3 Observatorio", making it a key point for efficient logistics and distribution.
